INAUGURAL ADDRESS

By JOHN M. MEADER, *Mayor*

Members of the Council:

The last two years have seen the City advance with the help and understanding of the Council. A new seventeen-room junior high school has been built, two major water extensions, and two additional parking lots. Have spent \$30,000 in needed repairs to our older grammar schools; new equipment in Public Works, Police Department and Schools; rebuilt city streets and country roads and paved many streets; adopted a new zoning ordinance and building code; established a park and recreation commission, as well as a new health commission.

It is my hope that in the next two years we can continue to help the City advance but only if we are willing to forget party and remember that we represent all of the people and work for progress and the good of our city. I believe that we should get professional help to complete a study required by the Federal Government to see if we need and can qualify for Federal Housing Aid. This will cost in the vicinity of \$10,000.

As you know, we raised the water rates last year. Although this was not a popular move at the time, it has proved financially sound. We now need to extend a water pipe to East Rochester along Eastern Avenue so that the residents can have adequate water, as well as fire protection. This can be done and paid for out of water revenue and will not affect the tax rate.

I would suggest that this Council should ask the State Delegation to change our Charter to do away with our present caucus system and establish a primary system where anyone can file if he wishes to run for office. We will need the help of all the citizens if we are to be successful in this change.

We, as a city, very much need new industry. It is vital to our economy. Mayors for many years have talked about this need, and Councils have tried to do something about it. My belief is that we can do something about it, but only if we are willing to provide a shield. We have many people who have worked very hard to get new industry, but all have been handicapped by not having an industrial space available.

I think that Elbert Hubbard in his notebook has explained my ideal better than I can so will read his. "I will try to fix my thought on the good that is in every soul, and make my appeal to that. And the plan is a wise one, judged by results. It secures for you loyal helpers, worthy friends, gets the work done, aids digestion and tends to sleep o' nights. I do not believe in governing by force, or threat, or any other form of coercion. I would not arouse in the heart of any of God's creatures a thought of fear, or discord, or hate, or revenge. I will influence men, if I can, but only by aiding them."

REPORT OF THE DEPARTMENT OF PUBLIC WORKS

*To the Honorable Mayor and City Council of the City of
Rochester, New Hampshire.*

Gentlemen:

I submit herewith my report of the Public Works Department for the year ending December 31, 1961.

The first six weeks of 1961 saw continuous snow removal and salting and sanding activity. Then, the first two weeks in March gave us a total of 25 inches of snow alone. The last of December saw heavy snowfall making a total of approximately 75 inches for the year. These storms necessitated additional hours of work and added expense.

In February we were able to do a small amount of patching but it was late in March before we could start our regular patching program.

During the Summer we surface-treated many of our streets. North Main St. from the Square to Union St. was rebuilt and surfaced, Bridge St. was resurfaced and a portion of Wakefield St. was resurfaced under Town Road Aid "B" Funds. Portland St., Whitehall Road, about 500 ft. on Chestnut Hill Road and the roadway from Summer St. to Autumn St. was resurfaced. We have started reconstruction of an additional section of the Gear Road using Town Road Aid "A" Funds. Over 6,500 gallons of road oil for dust laying purposes was applied to many sections of untarred roads to keep dust to a minimum.

We built approximately 3800 feet of sidewalk from South Main St. to the new Junior High School and approximately 2800 feet of sidewalk was installed on Chamberlain St. under contract. Also, sidewalks were installed on Spruce and Logan Streets as petitioned for by the abutters.

Our shade trees were sprayed twice to combat disease in the early part of the Summer. Many trees have been trimmed to remove dead wood. We have removed approximately 50 trees running from 16" to 36" at the butt, that were dead and diseased.

Gutter lines have been cleaned and regraded in many places to improve the flow of water and many new culverts have been installed using over 850 feet of various sizes. Also, our Surface Drains and Catch Basins have been cleaned.

We have hauled over 5,000 Cu. Yd. of material to cover our Dump in addition to using our street sweepings for this purpose. Washouts have been repaired as they occurred and gravel hauled to Harding Ave., Gonic, Gear Road, Villanova Lane, Franklin St. and to Cochece Avenue and Autumn Street in East Rochester.

Our Water Division finished connecting over services on Harding Street to the new water main as well as doing the necessary work raising manholes and gates on North Main and Wakefield Streets prior to resurfacing.

Water main extensions were completed on Towle St., Tingley St., Henrietta St., Church St., Gonic, Letourneau St., Dodge St., Summer St., Paradise Drive, Hampshire Ave. and Birch Street using over 3,100 ft. of 6" Cement Lined Cast Iron Pipe. Sixty new services were installed and thirty-five services relaid.

We have continued to send samples of our water to the State Board of Health regularly and they report the continued high standard of our water. Hydrants were flushed during the Spring and Fall, brush has been cut around our ponds and the screens cleaned regularly. We have treated the ponds as necessary to combat algae.

For years this department has recommended the installation of a second pipeline to feed East Rochester which would be at a lower elevation than the present line over Portland Street. The elevation on Portland Street at Adams Corner is approximately 25 feet lower than the elevation at the reservoir. Therefore, any drop in pressure caused by a break, fire, or peak usage during the Summer will greatly decrease the amount of water going over the hill to East Rochester. This would increase the water flow for fire protection in East Rochester by providing a better grid of pipelines. The streets would have a flow available from each end thus doubling the amount of water available.

We installed thirty two new sewer connections and sewer main extensions were completed on Chamberlain St., Winter St., Gonic, Letourneau St., Dodge St., Paradise Drive and Hampshire Avenue using over 1700 feet of 6" Asbestos Cement Pipe for this purpose.

I take this opportunity to express my appreciation to our Mayor, our Public Works Committee and members of the City Council for their help and consideration and the employees of the Department for their continued cooperation and loyalty.

Working together we are striving to make Rochester a better place in which to live for future generations as well as ourselves.

Respectfully submitted,

GEORGE C. NADEAU
Commissioner

REPORT OF CHIEF OF POLICE

I have the honor to submit the following report of the Rochester Police Department for the year ending December 31, 1961.

	<hr/>
	\$18,547.14

Following are the activities of the Police Department for 1961:

Buildings found unlocked	513

Accidents investigations	171
Fatalities	2
Personal injuries in auto	51

Articles found	30
Autos reported stolen	17
Autos recovered (2 from other city)	19

During 1961, our criminal arrests decreased over 20%, and the motor vehicle arrests increased 31% over 1960. A great factor in these statistics was by having two cruisers on patrol in 1961. This is a great help in stopping crime in our City.

Our citizens and public officials are also deserving of commendation for making this record possible. Without their help, our job would be most difficult indeed.

Our City is growing; traffic is an ever increasing problem. Society seems to depend more and more on the uniformed officer for assistance to enable us to live in peace and harmony in today's complex existence. However, with intelligence and cooperation from elected and appointed officials and the public, we look with confidence toward the future.

I would like to recommend to the Mayor and the City Council to study the possibilities of having an ordinance licensing Pin Ball machines in our City for we have no control over these machines, and by having licenses on these machines, we could have better control on where to have them, also the kind of machines.

I would at this time like to express my sincere appreciation to his Honor the Mayor, the members of the City Council, and to the Police Commissioners for the very fine cooperation and assistance rendered to us during the last year. I also wish to extend my thanks to the members of the Police Department for their loyalty and devotion to duty, and to the other Municipal, County, and State Departments for their interest and assistance in dealing with the problems of our organization during the year just ended.

In closing, the Rochester Police Department would like to extend its thanks to all the residents of Rochester, to the press and radio, and to all the others who have worked with us during the year 1961. Such cooperation has aided us immensely in the performance of our duties.

Respectfully submitted,

ERNEST J. LEVESQUE
Chief of Police

REPORT OF SUPERINTENDENT OF SCHOOLS

To the Rochester School Board:

I herewith submit my thirteenth annual report as Superintendent of Schools in Rochester.

The statistical and financial reports for the Calendar year 1961 are included in the usual form making comparison with records of previous years convenient and meaningful. Due to the revision in the bookkeeping system and reports required by the State Board of Education effective July 1, future reports may vary considerably from these traditional forms.

The Spaulding High School Student Activity Fund and the Rochester School Lunch Service are operated on the fiscal year ending June 30 and are listed separately from the revenue and expenditures included in the regular school budget which operates on the calendar year.

PERSONNEL

All employees of the Rochester School Department with salaries are listed in this report.

Mrs. Myrtle Cheney, Secretary to School Superintendent in Rochester for forty-four years, resigned as of December 1, 1962 due to personal reasons. Her long and efficient service to the School Department establishes a record that may never be surpassed.

Mr. Leo E. Beaudoin, a member of the Rochester School Board, completed twenty-five years of excellent service to the city as of December 31, 1961. During this time he attended meetings of the School Board regularly and hundreds of committee meetings. The time and effort he has spent on school problems has been an example of real community service as School Board members serve without pay in Rochester.

Nine teachers resigned at the close of the school year in June 1961. In addition to the replacements for these positions three high school and two elementary teachers were employed in September 1961 due to increased enrollments and the reorganization of classrooms including the use of the New Junior High School building. These additional teachers and classrooms permitted a decrease in the average class size, thus improving opportunities for instruction.

NEW JUNIOR HIGH SCHOOL BUILDING

On September, 1961 pupils entered the new Junior High School Building on Chamberlain Street.

The activities room, school lunch facilities, heating plant, and some other facilities were not ready for use at that time due primarily to delays in the electrical installations and other shipments. The school was dedicated on December 10, 1961.

PROBLEMS AND RECOMMENDATIONS

The present school year in Rochester is one of transition. Additional pupils, teachers, and school buildings with many revisions in schedules, curriculum and personnel coming at about the same time cause some confusion but also indicate considerable progress and a need for more improvements.

The difficulty in maintaining an adequate teaching staff is being increased by three factors:

1. High salaries elsewhere.
2. Higher professional requirements for the certification of teachers.
3. The demand for technically trained people in other fields than the teaching profession.
4. The increase in the total number of teachers needed in the profession due to the nationwide increase in the number of pupils enrolled in the schools and colleges.

The replacement of many teachers annually in Rochester due to competition, retirements, and personal reasons makes changes in the salary schedule imperative if high quality instruction is to be maintained by attracting well qualified new teachers.

The use of the New Junior High School building for pupils in grades 7 and 8 would solve several problems at Spaulding

High School. Additional classrooms will be needed for pupils in grades 1 to 6 before this change can be made.

A review of The School Board Policy for transportation to the Rochester Schools should be made. At the present time an accumulation of temporary exceptions have extended routes, increased the number of stops, and the required time on the road more than is desirable.

The education of children in the public schools requires various instructional methods and materials at each grade or age level due to a wide range of abilities and attitudes. The use of intelligence and achievement tests administered to all pupils help to determine educational growth of individual pupils and also those areas that may need additional emphasis generally.

I believe that more testing and evaluation work should be done in the schools and more emphasis placed on guidance work with the pupils. Teachers with special professional training and ability in this area are needed. It should be expected that such qualified personnel would command much higher salaries than regular classroom teachers.
